

Programme Specifications

MPH Programme: Batch 2022

Programme:
097: Master of Public Health (MPH)

Department:
Allied Health Sciences

Faculty of Life and Allied Health Sciences
M.S. Ramaiah University of Applied Sciences

University House, New BEL Road, MSR Nagar, Bangalore – 560 054

www.msruas.ac.in

UNIVERSITY’S VISION, MISSION AND OBJECTIVES

The M. S. Ramaiah University of Applied Sciences (MSRUAS) will focus on student-centric professional education and motivates its staff and students to contribute significantly to the growth of technology, science, economy and society through their imaginative, creative and innovative pursuits. Hence, the University has articulated the following vision and objectives.

Vision

MSRUAS aspires to be the premier university of choice in Asia for student-centric professional education and services with a strong focus on applied research whilst maintaining the highest academic and ethical standards in a creative and innovative environment.

Mission

Our purpose is the creation and dissemination of knowledge. We are committed to creativity, innovation and excellence in our teaching and research. We value integrity, quality and teamwork in all our endeavors. We inspire critical thinking, personal development and a passion for lifelong learning. We serve the technical, scientific and economic needs of our society.

Objectives

1. To disseminate knowledge and skills through instructions, teaching, training, seminars, workshops and symposia in Engineering and Technology, Art and Design, Management and Commerce, Health and Allied Sciences, Physical and Life Sciences, Arts, Humanities and Social Sciences to equip students and scholars to meet the needs of industries, business and society
2. To generate knowledge through research in Engineering and Technology, Art and Design, Management and Commerce, Health and Allied Sciences, Physical and Life Sciences, Arts, Humanities and Social Sciences to meet the challenges that arise in industry, business and society
3. To promote health, human well-being and provide holistic healthcare
4. To provide technical and scientific solutions to real life problems posed by industry, business and society in Engineering and Technology, Art and Design, Management and Commerce, Health and Allied Sciences, Physical and Life Sciences, Arts, Humanities and Social Sciences
5. To instill the spirit of entrepreneurship in our youth to help create more career opportunities in the society by incubating and nurturing technology product ideas and supporting technology-backed business
6. To identify and nurture leadership skills in students and help in the development of our future leaders to enrich the society we live in
7. To develop partnership with universities, industries, businesses, research establishments, NGOs, international organizations, governmental organizations in India and abroad to enrich the experiences of faculties and students through research and developmental programmes

PROGRAMME SPECIFICATIONS: MASTER OF PUBLIC HEALTH (MPH)

Faculty	Faculty of Life and Allied Health Sciences (FLAHS)
Department	Allied Health Sciences
Programme	Master of Public Health (MPH)
Head of the Department	Dr. Tushar Shaw

1. **Title of the Award**
MPH
2. **Mode of Study**
Full-Time
3. **Awarding Institution/Body**
M.S. Ramaiah University of Applied Sciences, Bangalore (India)
4. **Joint Award**
--
5. **Teaching Institution**
Faculty of Life and Allied Health Sciences
M.S. Ramaiah University of Applied Sciences, Bangalore (India)
6. **Date of Programme Specifications**
July 2022
7. **Date of Programme Approval by the Academic Council of MSRUAS**
July 2022
8. **Next Review Date**
June 2024
9. **Programme Approving Regulatory Body and Date of Approval**
--
10. **Programme Accrediting Body and Date of Accreditation**
--
11. **Grade Awarded by the Accreditation Body**
--
12. **Programme Accreditation Validity**
--
13. **Programme Benchmark**
14. **Background and Details of the Programme**

14.1 Background and Need

Despite significant achievements over the years, public health challenges continue to daunt the governments and health authorities, both in India and elsewhere. Over the years, life span of people has risen; leading killers such as malaria, polio and measles have been controlled; we have seen reduction in the deaths of women and children all over the world. However, non-communicable disease such as cardio-vascular diseases, diabetes, cancers and mental health issues continue to affect in large scale, and India is no exception. In addition, epidemic outbreaks such as SARS, Ebola and more recently novel coronavirus (COVID-19) that quickly progress into global pandemics have huge implications for socio-economic development and progress of the nations. If these challenges are not effectively tackled with the right scientific tempo and public health approaches, these challenges have the potential to halt or even reverse the progress of the nations by several decades.

Public health is an essential component of a health system as it is responsible for reducing morbidities and mortalities by maintaining and improving health of population. India is ranked in the bottom quantile for overall Sustainable Development Goals (SDGs), which necessitates a well-trained and motivated health workforce. There is a recognized need to initiate and appropriately strengthen the public health education in the country in consort with considerable investment in public health. To address this, quality training is needed to create professionally trained public health workforce who can significantly contribute towards strengthening the Indian health system.

In 2012, the high level expert group for universal health coverage for India recommended strengthening of the health system by supporting postgraduate programmes in public health. Along with this, it has been iterated that the present health syllabi in the country are not abreast with the changing dynamics of public health, health policies, demographics and epidemiological transitions. Despite the undeniable need to strengthen India's health workforce, it can be argued that MPH programmes are currently undersubscribed. Furthermore, it is increasingly felt that the training of public health students at the post-graduate level are lacking explicitly as per the stated standardized competency framework that is tailor made for the Indian context. Therefore, increased clarity on the training and role of public health graduates in the Indian context would help institutions adjust their programmes and ensure graduates with required skill-sets, competencies, attitude and motivation.

MPH programmes being offered in India have witnessed a rapid expansion in the past two decades. Unfortunately, the supply and demand for public health graduates are not matched. Currently, there are 44 educational institutions offering MPH programme, out of which 26 are privately owned and 18 are in the public sector. Even though there is a recognized need to strengthen the public health workforce in India, there is no clearly defined career pathways for MPH graduates in the national public health system. This clearly implies that the institutions and public health bodies must collaborate to design and deliver MPH programmes to address the identified competencies. These competencies are the ones defined in consultation with the experts at national and international levels considering globalization and other factors.

Ramaiah University of Applied Sciences expresses its solidarity through building a competent and compassionate public health workforce through its Masters and Doctoral training programmes in Public Health. The MPH programme being offered under Ramaiah University of Applied Sciences has been developed in consultation with eminent global health and public health experts while drawing learning and experience from other successful courses both within the country and outside. The graduates will be offered exposure to many disciplines that contribute

to the public health like health care, behavioral and social sciences, epidemiology, statistics, management, communication, environment, nutrition, ethics and public policy. This course will be particularly relevant for those who seek to respond to the public health challenges through developing and scaling up innovations in health care delivery, research and knowledge generation, and health administration, etc. The course will train the students to become dedicated, competent and ethical public health researchers, practitioners, and policymakers who meet society's need to prevent and ameliorate local, national, and global public health problems.

14.2 Job Opportunities

There are plenty of job opportunities that range from the public to private sector: government, private health care, non-governmental organizations, academia, research enterprises, and donor agencies. The course will address the needs of various roles of a public health cadre: designing, planning and implementing national health programmes; primary health care provision; health administration; monitoring, research and evaluation; advisory and policy level functioning, etc. The course will also prepare students to pursue focused specialized opportunities such as health communication, health economics, behavioral sciences, public health ethics, policy, etc. Depending upon the competency level, qualification, work experience and attitudes, plenty of opportunities are possible at the local, state, national, regional and global levels. Here are some common roles that a public health professional can potentially take up:

- Epidemiologist
- Health educators and community health workers
- Occupational health and safety specialist
- Social and community service managers
- Public health management analyst
- Health communication specialist
- Public relations officer
- Research scientist
- Health resource professional
- Professor/lecturer
- Senior technical specialist – public health
- Environmental health specialist
- Social worker cum counsellor
- Monitoring and evaluation specialist
- Public health advisor

14.3 Unique features of MPH in RUAS

- Students are from diverse backgrounds that bring richness of perspectives and ideas which facilitate learning. We adopt innovative peer-driven and peer-centered learning

methods as part of our pedagogy.

- The students are trained by experienced faculty from various disciplines such as community medicine, public health dentistry, public health nursing, clinical specialty, social work, engineering and technology, integrative medicine, management, etc.
- RUAS faculty has excellent engagement with eminent global health platforms of University of Illinois, U.S.A and University of Manitoba, Canada, thus bringing their global health expertise to the teaching.
- Excellent networking opportunities through industrial visits, conferences, symposium, workshops and internships
- Strong collaborations with health organizations, policy centers, medical settings, public health centers and hospitals
- Competency-based and research-driven curriculum
- Rich immersion to the field programmes and challenges in public health so that students appreciate the issues, connect with the community and identify innovative solutions as part of student internship.
- Fosters strong sense of social justice, ethics and leadership during the programme

14.4 Admission process

- Target audience: Graduates from multidisciplinary medical backgrounds such as medicine, dentistry, physiotherapy, occupational therapy, AYUSH (ayurveda, yoga and naturopathy, unani, siddha and homoeopathy), nursing, veterinary sciences or pharmacy; and non-medical backgrounds such as engineering, statistics/biostatistics, demography, population studies, nutrition, sociology, economics, psychology, anthropology, social work, management, life sciences, social sciences, management, law and arts.
- Eligibility: Candidates should have at least 50% marks in aggregate and should secure at least 5.0 CGPA on a 10-point scale.
- Selection process:
 - Statement of purpose
 - Writing sample
 - Group Discussions
 - Personal Interview

15. Programme Aim:

The aim of this programme is to provide students with a multi-disciplinary experience across a whole range of public health competencies, areas and programs.

16. Programme Outcomes (PO's)

PO-1. Public health knowledge: Apply the knowledge of art, science, public health fundamentals, and a public health specialization to the solution of complex community problems.

PO-2. Problem analysis: Identify, formulate, review research literature, and analyse complex public health problems reaching substantiated conclusions using first principles of public health, natural sciences, and medical sciences.

PO-3. Design/development of solutions: Design solutions for complex public health problems and design system components or processes that meet the specified needs with appropriate consideration for public health and safety, and the cultural, societal, and environmental considerations.

PO-4. Conduct investigations of complex problems: Use research-based knowledge and research methods including design of interventions, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO-5. Modern tool usage: Create, select and apply appropriate techniques, resources, and modern medical engineering and tools including prediction and modelling to complex public health activities with an understanding of the limitations.

PO-6. Public health and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional public health practice.

PO-7. Environment and sustainability: Understand the impact of professional public health solutions in societal, occupational and environmental contexts, and demonstrate the knowledge of and need for sustainable development.

PO-8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the public health practice.

PO-9. Individual and teamwork: Function effectively as an individual and as a member or leader in diverse teams and in multidisciplinary settings.

PO-10. Communication: Communicate effectively on complex public health activities with the engineering community and with society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO-11. Project management and finance: Demonstrate knowledge and understanding of public health and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO-12. Life-long learning: Recognize the need for and have the preparation and ability to engage in independent and life-long learning in the broadest context of scientific change.

17. Programme Education Objectives

PEO-1. Provide students with a strong foundation in public health principles, concepts and research, to enable them to devise and deliver effective solutions to challenging public health problems

PEO-2. Impart technical skills required to develop innovative solutions as per behavioral, technological and structural requirements in public healthcare

PEO-3. Impart the required managerial and entrepreneurial skills to enable students to contribute to the public healthcare industry as specialist

PEO-4. Instill human values, social, interpersonal and leadership skills required for professional success in evolving as global professionals

18. Programme Specific Outcomes (PSOs) for MPH Program

At the end of the MPH Programme, the post-graduate will be able to:

PSO-1. Apply the knowledge of epidemiology, biostatistics and behavioral science in public health to develop innovative and safe solutions to challenges

PSO-2. Adapt to technological advancement in diagnostics, planning and implementation by upgrading to the latest design processes in public health

PSO-3. Demonstrate the leadership qualities and strive for the betterment of organization, environment and society

PSO-4. Demonstrate an understanding of the importance of life-long learning through professional development, practical training and specialized certifications

19. Programme Structure:**MPH Programme**

This is designed for the students who aspire to become public health professionals with a goal of administering health programmes, undertaking research and analyzing and interpreting data for public health action and policy. The programme is designed for a total of 72 credits of which 36 credits include core courses, 8 credits of research courses, 18 credits will be fulfilled by project work, internship and dissertation and 10 credits of electives.

The following are the courses a student is required to successfully complete for the award of MPH degree. The programme is delivered as per the time-table.

SEMESTER-I

S. No.	Code	Course Title	Theory (h/W/S)	Tutorial (h/W/S)	Practical (h/W/S)	Total Credits	Max. Marks
1	PHC501A	Principles and Practice of Public Health	2	1	0	3	100
2	PHC502A	Public Health Systems and Health Policy	3	1	0	4	100
3	PHC503A	Epidemiology	2	1	0	3	100
4	PHC504B	Healthcare Management and Leadership	3	1	0	4	100
5	PHC505A	Biostatistics	3	1	0	4	100
6	PHO501A	O/GEC-1	2	0	0	2	50
Total			15	5	0	20	550
Total number of contact hours per week				20 hours per week			

SEMESTER-II

S. No.	Code	Course Title	Theory (h/W/S)	Tutorial (h/W/S)	Practical (h/W/S)	Total Credits	Max. Marks
1	PHC506A	Public Health Priorities in India- I	3	1	0	4	100
2	PHC507A	Public Health Priorities in India-II	3	1	0	4	100
3	PHC508A	Research Methodology in Public Health	3	1	0	4	100
4	PHC509A	Health Behaviour and Health Promotion	2	1	0	3	100
5	PHC510A	Ethics in public health	1	1	0	2	50
6	PHE5XXA	MDEC-1	2	1	0	3	100
Total			14	6		20	550
Total number of contact hours per week				20 hours per week			

SEMESTER-III

S. No.	Code	Course Title	Theory (h/W/S)	Tutorial (h/W/S)	Practical (h/W/S)	Total Credits	Max. Marks
1	PHC601A	Global Health	1	1	0	2	50
2	PHC602A	Technology in Public Health	2	1	0	3	100
3	PHC603A	Programme Planning and Evaluation	2	1	0	3	100
4	PHC604A	Demography and Population Sciences	1	1	0	2	50
5	PHP605A	Project work	0	0	10	5	150
6	PHE6XXA	MDEC -2	2	1	0	3	100
7	PHP606A	Dissertation-Part 1	0	0	6	3	200
Total			8	5	16	21	750
Total number of contact hours per week				29 hours per week			

SEMESTER-IV

S. No.	Code	Course Title	Theory (h/W/S)	Tutorial (h/W/S)	Practical (h/W/S)	Total Credits	Max. Marks
1	PHE6XXA	MDEC-3	2	1	0	3	100
2	PHOXXA	O/GEC-2	3	0	0	3	100
3	PHP607A	Dissertation-Part 2	0	0	14	7	300
4	PHI608A	Internship	0	0	12	6	150
Total			5	1	26	19	650
Total number of contact hours per week				32 hours per week			
Maximum Marks				2500 (550+550+750+650)			
Total Credits				80 (20+20+21+19)			

Note: The vacations and other activities shall be as per the time-table for the corresponding batch.

20. Elective Courses**1. Major Discipline Elective Courses (MDEC)**

We offer three major discipline elective courses (MDEC-1, MDEC-2 and MDEC-3) of equivalent credit (i.e., 2 credits) as mandatory electives from the list given. At the beginning of the academic year, 3 mandatory electives will be chosen by (the head of the institute) based on the public health competency requirements in

the field (in discussion with NGOs, academia, Government. and research agencies) and also availability of respective course leader.

Major Discipline Elective Courses (MDEC) (MDEC)
Qualitative Research methods (semester 2)
Environment and Health (semester 2)
Implementation Research Methods (semester 3)
Health Economics (semester 3)
Evidence synthesis (semester 4)
Population Microbiology (semester 4)

2. Open/Generic Elective Courses (O/GEC)

We offer two Open/Generic Elective Courses (O/GEC -1 and O/GEC-2) of equivalent credit (i.e., 2 credits) in semester 1 and 4, respectively. Open elective courses in the first semester are generic in nature, such as soft skills and leadership, digital fluency, foreign languages, health and wellbeing (yoga and philosophy) in alignment with NEP 2020 guidelines to promote holistic development of students. Open elective in the fourth semester will be related to public health domain over and above what is taught in the regular mode. The student can opt for UGC-Massive Online Open Courses SWAYAM portal/Coursera or from any Faculty of MSRUAS offering open elective or from the below list.

Open/Generic Elective Courses (O/GEC)
Infectious Disease Epidemiology (RUAS)
Cancer Epidemiology (RUAS)
Advanced Epidemiology in Health Sciences (RUAS)
Advanced Bio-statistics in Health Sciences (RUAS)
Health Insurance and Health Financing (RUAS)
Health Technology Assessment (RUAS)
Cluster Randomized Controlled Trials (RUAS)
Nutritional Epidemiology/Public health nutrition (RUAS/RICPHI)
Social Marketing and Public Health (RUAS/KHPT/IHAT)
Quality Improvement and Management in Public Health (RUAS)
Health Inequity and Social Determinants (RUAS/RICPHI)
Integrative Health Research Methods (RUAS)
Mixed Methods Research (RUAS)
One-Health Approach (RUAS)
Integrative Disease Surveillance (RUAS)
Concurrent Monitoring and Evaluation Of Health Programmes (RUAS/KHPT/IHAT)

Oral Health Promotion (RUAS)
Public Health Nursing (RUAS)
Community Optometry (RUAS)

MPH with Specialization (optional)

Specializations in MPH are aimed at providing an in-depth, specialized knowledge and skills in a specialized area of public health. The students will be provided with a choice to select their area of interest based on the available specialization, offered in collaboration with local partners such as RICPHI, KHPT, IPH etc. and global partners such as UIC, UoM (IIDGHTP), etc. The student can opt for specialization on accumulation of a minimum of 25 credits comprising of project work, electives, core course, dissertation and internship in a particular public health domain.

We offer the following specializations:

- Maternal, Neonatal and Child Health
- Adolescent Health
- Non-Communicable Diseases
- Infectious Diseases
- Public Health Nutrition
- Integrative Health
- Digital Health
- Occupational Health

Proposed Choice-based Credit System Structure for MPH programme

Proposed CBCS Structure for MPH Programme					Total Credits
Major Discipline Core course (MDCC)	PHC501A Principles and Practices of Public Health Credit-3	PHC502A Public Health Systems and Health Policy Credit-4	PHC503A Epidemiology Credit-3	PHC504B Healthcare Management and Leadership Credit-4	37
	PHC506A Public Health Priorities in India-I Credit-4	PHC507A Public Health Priorities in India-II Credit-4	PHC509A Health Behaviour and Health Promotion Credit-3	PHC510A Ethics in Public Health Credit-2	
	PHC601A Global Health Credit-2	PHC602A Technology in Public Health Credit-3	PHC603A Programme Planning and Evaluation Credit-3	PHC604A Demography and Population Sciences Credit-2	
Major Discipline Elective Courses (MDEC-1, MDEC-2, MDEC-3)	PHE5XXA MDEC-1 Credit-3	PHE6XXA MDEC-2 Credit-3	PHE6XXA EC-3 Credit-3		9
Open/ Generic Elective Courses (O/GEC-1, O/GEC-2)	PHO5XXB O/GEC-1 Credit-2	PHO6XXB O/GEC-2 Credit-3			5
Research Courses (RC)	PHC505A Biostatistics Credit-4	PHC508A Research Methodology in Public Health Credit-4			8
Project work/ Dissertation/ Internship	PHP605A Project work Credit-5	PHI608A Internship Credit-6	PHP607A Dissertation Credit-10		21

Sl.No.	Course Type	Credit
1	Major Discipline Core course	37
2.	Major Discipline Elective Courses	09
3	Open/Generic Elective Courses	05
4	Research Courses	08
5	Project work/Dissertation/Internship	21
Total Credit		80

a. Programme Delivery Structure

The programme is delivered on weekdays from Monday to Saturday as per the time-table.

b. Teaching and Learning Methods

The course delivery comprises of a combination of few or all of the following methods:

- Face-to-face lectures using audio-visual aid.
- Case-based learning
- Workshops, group discussions, debates and presentations
- Demonstration
- Guest lectures from industry and academia
- Laboratory/field work

- vii. Industry visit/visit to public health/health organizations
- viii. Seminars/conferences
- ix. Group exercise
- x. Project exhibitions

c. PHP605B Project Work

This course is intended to apply and synergize the learning outcomes of MPH programme through a project work. As part of the project work, students will be placed in different public health/health organizations such as sub-centers, primary health centers, community health care centers, district hospitals, first referral units and outreach centers in rural and urban areas. The project will enable the students to apply the theoretical and practical aspects of community-based or health-facility survey and project on relevant public health issue. This facilitates understanding and exploration of how the National Health Programmes are implemented at the population, health-facility and household levels.

d. PHI608B Internship

As part of the internship course, students will be placed in different public health/health organizations such as NGOs and reputed health organizations. This course will provide opportunity for experiential learning with respect to social determinants, understanding various factors that interplay in deciding the health of the community and initiatives taken at the local, regional and international levels to address public health challenges.

e. PHP607B Dissertation

A student selects a topic for dissertation based on the contemporary health issue and undertake the research. The dissertation requires primary data collection from health facilities/participants and preparation of a thesis at the Master's level and its defense. The students are also required to obtain Institutional Human Ethics Committee (IHEC) approval prior to primary data collection involving human subjects. In addition, students are encouraged to present a paper based on their research findings at a National/International conference and submit a manuscript for peer review publication in impact factor/UGC-CARE listed Journals. Please note that dissertation is considered completed only if both part-1 and part-2 are accomplished.

a. Assessment and Grading

A course assessment will have two components:

- Component-1: Continuous evaluation-60%
- Component-2: Semester-End Examination (SEE)-40%

For more details on the break-ups of weightage, please refer the respective course syllabus.

A student is required to score a minimum of 40% (independently in components 1 and 2) for successful completion of a course and earning the credits.

Note: Final marks awarded in each of the courses will be confirmed only after SAB/PAB as

explained in Academic Regulations of MPH programme.

b. Attendance

A student is required to obtain a minimum of 75% attendance to be eligible to write the examination. Less than 75% attendance is considered FAIL; such a student is required to follow the same procedure as that of a failed student.

c. Award of degree

As per the Academic Regulations for MPH programme.

d. Student Support for Learning

Students are given the following support:

- a. Reference books in the library
- b. Pre-reads and handouts
- c. Cases/case study
- d. Magazines and journals
- e. Internet facility
- f. Computing facility
- g. Laboratory facility
- h. Workshop facility
- i. Staff support
- j. Lounges for discussions
- k. Any other support that enhances their learning

e. Quality Control Measures

The following are the quality control measures:

1. Review of question papers and assignment at the Department level
2. Student feedback
3. Opportunities for the students to see their assessed work
4. Review by external examiners and external examiners reports
5. Staff student consultative committee meetings
6. Student exit feedback
7. Subject assessment board
8. Programme assessment board

Co-curricular Activities

Students are encouraged to participate in co-curricular activities like seminars, conferences, symposium, paper writing, attending industry exhibitions, project competitions and related activities to enhance their knowledge and network.

Cultural and Literary Activities

Annual cultural festivals are held to unwind and ignite the creative endeavors, and students are encouraged to plan and participate in cultural and literary activities.

Sports and Athletics

Students are encouraged to participate in out-door and in-door games on regular basis.
